

Does God Heal Today?

FATHER ARIEL PROCLAIMED "GOD IS IN THE PROCESS OF HEALING...."

A first person witness!

While viewing my MRI the surgeon said "Your spine has fused". He went on to explain a fusion usually happens gradually over an extended period of time. However, God had a different option for me. I told him my experience and he believed that I even knew exactly when this fusion took place.

After lower back surgery to relieve a pinched nerve in December 2012, I was later found to have contracted two deadly, slow-growing staph infections in the area which, when finally cured by long-term antibiotic treatment, left a separation in the spine which caused chronic weakness and pain. If the bone didn't fuse on its own, further surgery would be

necessary including insertion of a rod. Time was short for this to happen and the separation still no better when in October 2013 I attended the Camden Diocesan Catholic Charismatic Convention in Wildwood, New Jersey.

I shall never forget the word Fr Ariel Hernandez gave during a healing session. He said "God is in the process of healing backs, specifically lower backs". He had my attention! Father Ariel continued "You will know you are healed when you feel heat in that area". At that moment the solidly frozen ice pack I had on my lower back turned into a hot water bottle. I knew God had healed me!

When the doctor heard my story, his response was "someone up there likes you". His next sentence is what every patient wants to hear. He pointed his finger at me and said, "You don't need me anymore". Praise God!

(Linda Metz, Sanctuary Prayer Group, Lancaster)
